Choose your level of reporting

I-TRAP Security Monitoring service is comprised of several different layers of reporting. Each level has been designed to assist network managers in understanding the nature of security threats and potential network exposures.

Investigate the service level for network reporting and security measures needed for your network.

	Level 1	Level 2	Level 3
Real Time Firewall Reporting via Secure Web Interface	X	X	X
Daily E-mail Reports	X	X	X
Rules Based Alerting from 24x7 NOC	X	X	X
I-Trap Customer Premise Device	X	X	X
Reporting and Alerting for Firewalls	X	X	X
Additional Sensor Capability for DMZ's or VLAN support		X	X
Intrusion Detection Sensor		X	X
Additional Web Interface for IDS		X	X
Attack Detection Sensor			X
Additional Web Interface for ADS			X
